

## Year 5

### Shoe Drawing

#### Week 8

*Please use this week as a catch up week for completing any unfinished artwork.  
If you have completed everything you may like to complete a shoe drawing.*

See Help video for demonstration on learn to draw shoe  
<https://safeYouTube.net/w/YWGE>

1. Remove one shoe and place it on your desk.
2. On a 9x12 paper, make light pencil marks to indicate placement for both the toe and the heel. This helps ensure that your whole shoe will fit on the paper!
3. Then, *slowly* draw the contour (outside edge) of your shoe moving your pencil across the paper as your eye moves along the edge of your shoe. I like to start at the toe, move across the bottom, up the back edge, across the top and then return back to the toe again. Try to go slowly and include every nook, cranny, bump and bulge. Spend as much time looking at your shoe as you spend looking at your paper.
4. Next, add any interesting details, like stitching where different sections are joined. Do *not* add any shading!
5. When your pencil drawing is finished, trace over your pencil lines with an Ultra Fine black Sharpie. Then erase any pencil lines that are still showing.

Add colour inside the shoe or around the outside of the shoe. You could divide your shoe up into smaller sections and do various designs with patterns and colour.
